

# JOKKY GARMENTS LTD

40 YEARS OF INDUSTRIAL LEADERSHIP

# COMPANY PROFILE

## Who We Are

Jokky Garments Ltd. is a high-tech, efficient and one of the most productive apparel manufacturers in Bangladesh. Established in 1982. It is a 100% export oriented Woven Garments factory (Men's & Ladies Top & Bottom Items). Jokky Garments is a sister concern of Opsonin Pharma Limited, one of the largest and most advanced pharmaceutical companies in the country.

# ABOUT US

## WHY CHOOSE US

A streamlined, technologically advanced, and efficient lineup of machines.

Exceptional levels of productivity and efficiency.

Certified compliant in BSCI, SEDEX, ISO, ILO.

The synergy of our human capital.

## OUR VISION

To deliver high-quality products and exceptional services to our customers by harmoniously blending safety, quality, and efficiency while diligently maintaining our integrity, honesty, and dedication towards environmental and social responsibilities

## OUR MISSION

To become the benchmark manufacturing company for the garments industry providing world-class products through the integrity, teamwork and creativity of our people driven by our constant commitment to outstanding overall customer satisfaction.

As one of the leading apparel manufacturing companies in Bangladesh, we stand out in providing our clients with the highest level of satisfaction by ensuring that your innovations in design, fabrics and your final product are brought to life.

## CORPORATE SOCIAL RESPONSIBILITY

Jokky Garments also extend our responsibilities to the whole community around us. We believe that it is not our liability to perform corporate social responsibility (CSR); rather it is our responsibility to make the society a better place to live in.

## INSPECTIONS

We have our own fabrics inspection machine. Each & every consignment of fabrics is randomly inspected through this machine before issuing for bulk production. Usually, we follow JCP 4-point system as inspection method. Regarding the accessories, right upon receipt from the supplier, within 24 hours the store do inventory report regarding both quality and quantity.

## Design & Development

We assist our clients in creating fit and designs for garments. We offer a vast variety of choices of fabrics, accessories and packaging methods (flat pack, boxed pack, hanging garments, etc.).

## PRODUCTION CAPACITY

Our facility runs 8 lines manufacturing units, with a monthly capacity in the range of 180,000 - 200,000 pieces.

Material Inventory  
 Fabric Inspection  
 Pattern & Marker check & Approval  
 Pre-production Meeting & Size set  
 Sample Approval  
 Trial Cutting  
 Panel Numbering/ Bundling  
 Trial Production  
 Front Placket, Cuff, Color, Fusing & Making Inspection  
 First Inline Comments & Rectification  
 Bulk cutting & Production ( As like trial cutting/ production)  
 2nd Inline comments & Rectification  
 100% Trimming & Inspection  
 Thread Sucking  
 Ironing  
 100% Quality Inspection  
 Folding/ Ploy Packing  
 100% Getup & Presentation Checking  
 Metal Detection (As required)  
 Packing /Cartooning  
 Final Inspection  
 Export

## Quality

Our Quality Control System, continuously improved over our 40 years of establishment, is comprised of thorough material, process and product checks. Our focus is on an ever-decreasing rework and repair rate, allowing us to offer our services to any AQL(Acceptable Quality Limit) requirement.

## PRODUCTION

We specialize in woven shirts for Men, Women and Children, and have over 4 decades of experience in manufacturing tops and bottoms for all three categories.

## SAMPLING PROCESS

### Pattern

All the patterns are made and Design by Auto CAD

### Sample

All samples are made exclusively in the sample room.

### Sampling process

Upon confirmation of an order, the sample section is instructed to make the sample for fit/styling approval. After getting Buyer's comment on that, Sample section goes for size set sampling as per the specs given by customer. This is mandatory that all samples must have checked by the pattern master and merchandising section prior submitting to customer. Our sample section also provides photo samples or pre-production samples wherever is required.

## SOURCING

Taking advantage of our long-lasting business operation, we have developed an outstanding supply chain relationship with our suppliers, almost all of whom have been engaged with us in numerous repeated export orders. We are able to maintain long-term strategic partnership not just because we are in the garment industry for four decades, rather importantly, because our business with

regular suppliers is built on trust, transparency, commitment and cooperation. For all kinds of fabrics, accessories, washing, printing and embroidery requirements, we always have multiple local and international sourcing options in hand. Such rich industrial network enables us to streamline our production and precede all garment orders with equal efficiency and quality. We have very strong sourcing in Indonesia, Malaysia, India, Pakistan, Taiwan, China and HK.

## FINISHING PROCESS

### Pressing

There are total 18 sets vacuum tables and steam irons in the press and packing area with Gas Boilers.

#### Processes :

- Thread sucking
- Pressing
- Final quality control
- Folding
- Packing
- Get up checking
- Metal detection
- Cartooning
- Binding /stripping
- Metal Detection

The factory has a metal detector machine. The metal detector is tested in 2 times a day. A logbook is kept for each order. All garments are metal detected if it's required by customer. But for children's item- it's mandatory.

Product

# CERTIFICATION

Jokky Garments Ltd maintains a track record of excellence through obtaining SEDEX (Supplier Ethical Data Exchange), BSCI (Business Social Compliance Initiative), ISO (International Organization for Standard) as well as close working relationship with other ethical and compliance audits.

# Annual Health Screening Program

# CHILD CARE

# SAFETY AND SECURITY

JOKKY Garments provides employees with a safe and protected workplace in compliance with all applicable laws and regulations, ensuring fire safety, anti- electric shock pad with the help of an automatic tripping switch system, lightening protector with adequate lightening and ventilation. Moreover, usage of metal gloves in times of fabric cutting, needle guard in time of sewing and such similar procedures have significantly reduced work-related accidents in our factory. In essence, as a responsible apparel producer, we provide employees a work environment high above the law-required level. We have installed and updated lighting, ventilation and ergonomics using latest technologies like bus bar for electrical fitting, overhead mirror reflectors for lamps, forced duct ventilation and so on. The goal is to exceed requirements of local legislation and reach the global standards, and thereby support clients' images and sourcing principles. Clearly demarcated emergency routes and exits, smoke and fire detectors, consciously designed working lay-outs ensure a safe workplace for workers.
